PROFESSIONAL PROFILE

Creative Technologist with a multidisciplinary foundation spanning software and web development, AI automation, graphic design, copywriting, and metallurgical fabrication. I combine creative thinking with practical technical skills to build digital experiences, develop application features, create visual brand assets, communicate ideas clearly, and explore automation that streamlines repetitive work. As the person behind Beyond Microsoft (BMS), I am committed to continuous learning, purposeful problem-solving, and building solutions that are useful to people and organizations. Open to remote opportunities, internships, entry-level roles, freelance projects, and collaborative work.

CORE COMPETENCIES

Software & Web Development: HTML, CSS, JavaScript, PHP, Python, Laravel, React, Vite, Git, GitHub, VS Code

AI & Workflow Automation: n8n, AI-assisted workflows, prompt design, workflow planning, testing, API integration concepts

Graphic Design & Digital Experience: Brand identity, logo design, marketing assets, UI/UX fundamentals, CorelDRAW, Canva, Figma, Adobe design tools

Copywriting & Content: Website copy, brand messaging, marketing content, social media writing, calls to action, content structuring

Data & Platforms: MySQL, MongoDB basics, Laragon, Netlify, Railway, Microsoft 365, Google Workspace

Technical Foundation: Metallurgical fabrication, practical problem-solving, attention to detail, safety-minded execution

SELECTED PROJECTS & PRACTICAL WORK

Beyond Microsoft (BMS) — Portfolio & Brand — Building and maintaining a digital portfolio to present services, selected work, brand identity, and contact pathways across creative and technology disciplines.

Web Applications & Product Features — Worked on responsive web experiences and application features, with attention to usability, structured implementation, and maintainability.

AI Automation & Workflow Concepts — Designed and tested workflow ideas intended to reduce repetitive manual steps and connect digital tools more efficiently.

Branding, Design & Content — Created visual brand assets and communication content to help ideas, services, and projects appear clear and consistent.

CERTIFICATIONS

- AI Automation Certificate — Certificate obtained.
- AI Software Engineering — Certificate of Completion, LuTA; Certificate No. 0183; 15 September 2026.
- Copywriting Certificate — Certificate obtained.
- GDB Masterclass — Graphic Design Certificate, Innovation NG; issued 13 July 2026.
- Metallurgical Fabrication / General Welding Certificate — Certificate obtained.
